Sandya Kandregula

DevOps | DevSecOps | MLOps | Platform Engineer | AWS, GCP certified

Contact +91-8919382187 sandya.kandregula.dev@gmail.com **Professional Links:** Portfolio GitHub LinkedIn

Summary

Senior DevOps/DevSecOps/MLOps Engineer with over 12 years of comprehensive experience architecting, implementing, and managing highly scalable and available cloud infrastructure. Proven expertise in spearheading CI/CD pipeline development and optimization, significantly accelerating deployment cycles and enhancing system reliability. Proficient in Linux, Python, Docker, and Kubernetes, with a strong command of Infrastructure as Code principles for robust automation. Successfully optimized AWS and GCP environments, achieving measurable improvements in performance, cost-efficiency, and operational resilience. Dedicated to embedding security best practices throughout the entire development lifecycle, ensuring robust and secure cloud solutions. Delivers high-performing, cost-effective, and secure cloud platforms

Skills

Cloud Platforms: AWS, GCP, Azure, Tencent Cloud, Alibaba Cloud.

Data & Processing: AWS EMR

MLOps : SageMaker, MLflow, Vertex AI

GenAI & AI Tools : ChatGPT, Gemini, Claude, NoteGPT, FastAPI, Streamlit, Chatbot.

DevOps & Containers: Docker, Kubernetes, Helm, ArgoCD

Security & DevSecOps: GitLab SSO, AWS SSO, Authentik/IDP

Infrastructure as Code: Terraform, Ansible, Chef.

CI/CD & Automation: Jenkins, GitHub Actions, Azure DevOps, TeamCity, Octopus Deploy

Version Control Systems: Git, GitHub, Bitbucket, GitLab, Azure Devops

Programming & Scripting: Python, Groovy, Shell, Bash, JSON, YAML

Security & DevSecOps: SonarQube, CodeQL, Aqua, Snyk, Gitleaks

Monitoring & Observability: Prometheus,DataDog, Grafana, New Relic, LogicMonitor, OpenTelemetry

Cloud Migration & Tools: AWS MGN, VM Import/Export

Data & Processing: Redis, Redis Cloud, PostgreSQL, MinIO, ClickHouse

Tracking & ITSM Tools: Jira, ServiceNow, Confluence.

Integration Platform: MuleSoft Anypoint Studio

Operating Systems: Linux, RHEL, Windows

Certifications View Credentials

AWS: AWS Certified DevOps Engineer - Professional

AWS Certified Developer - Associate

GCP: Professional Cloud DevOps Engineer Certification

Generative AI Leader

Accomplishments

CI/CD Pipeline Design and Maintenance

Designed and maintained CI/CD pipelines using Git and GitHub, integrating security tools, and enabling containerized deployments with Docker, Kubernetes, Helm, and ArgoCD.

Cloud Infrastructure, Migration & DevOps Automation

Led multi-cloud infrastructure automation and Azure-to-Tencent Cloud migration using Terraform, implemented reusable IaC for DEV/QA/PROD, managed Kubernetes/ArgoCD and GitLab CI/CD governance, integrated Datadog/Grafana monitoring, security and access solutions, and created Jira boards to manage DevOps and infrastructure workflows.

CI/CD Pipeline Creation with MuleSoft Integration
Created CI/CD pipelines using Git, GitHub, TeamCity, and Octopus Deploy, integrating MuleSoft Anypoint Platform and New Relic to enhance deployment efficiency and observability.

End-to-End CI/CD with Azure DevOps and Kubernetes
Built end-to-end CI/CD pipelines using Azure DevOps, automating build and containerization workflows, and deploying applications to Kubernetes (AKS/EKS) for scalable and reliable releases.

DevSecOps Integration for Security and Compliance
Integrated DevSecOps into CI/CD pipelines by implementing automated SAST/DAST security scanning (SonarQube, Aqua, CodeQL), enforcing IAM and Terraform governance policies, and enabling proactive monitoring, alerting, and observability using LogicMonitor, Opsgenie, and OpenTelemetry to ensure system security, reliability, performance visibility, and SOC 2 compliance readiness across cloud-native environments.

Production-Ready MLOps Pipelines
Developed production-ready MLOps pipelines using AWS SageMaker and MLflow, enabling automated model training, experiment tracking, versioning, and deployment using FastAPI-based endpoints and Streamlit dashboards for real-time inference.

Optimized Big Data Processing Pipelines
Designed and optimized big data processing pipelines using AWS EMR (Spark/Hadoop), improving performance, scalability, and cost efficiency for large-scale data workloads.

Cloud Migration to AWS
Migrated on-premises virtual machines to AWS using rehost (lift & shift) strategy with VM Import/Export and AWS MGN, creating AMIs, automating imports via CLI, and enabling scalable EC2-based deployments.

Cross-Cloud Migrations to AWS
Executed cross-cloud migrations from GCP and Azure to AWS using rehost and retain strategies, ensuring minimal downtime and efficient resource utilization.

Led Repository Migration and Security Implementation
Led migration of repositories across GitHub Enterprise and GitHub Cloud, implementing security controls, access governance, and providing ongoing support and maintenance.

Improved Patching Processes
Evaluated patching processes, identified gaps, implemented improvements, documented workflows, and ensured compliance and operational stability.

Implemented DevSecOps for Security and Vulnerability Scanning
Implemented DevSecOps practices using Gitleaks, Qualys, and HashiCorp Vault for secure secrets management and vulnerability scanning.

Automated GitHub Repository Settings Capture
Built Python automation to capture GitHub repository settings, export reports, and upload to S3 for configuration comparison and audit readiness.

Experience

Nagarro | Sr Staff Engineer | Projects : CP Axtra.
June 2026 - till now | Vizag

- Led multi-cloud infrastructure automation across AWS, Azure, GCP, Tencent Cloud, and Alibaba Cloud using Terraform.
- Led the migration of Azure infrastructure to Tencent Cloud, using Terraform for automated provisioning, configuration, and environment setup.
- Designed and implemented Tencent Cloud infrastructure covering networking, Kubernetes, databases, storage, load balancing, DNS, monitoring, and security.
- Decoupled application and infrastructure components during the Azure-to-Tencent Cloud migration, establishing reusable Terraform-based infrastructure for DEV, QA, and PROD.
- Implemented GitLab CI/CD governance, including branch protection, MR validation, approval workflows, Terraform plan checks, and deployment automation.
- Managed Kubernetes and ArgoCD/GitOps deployments across multiple environments.

- Implemented Datadog observability for application and infrastructure monitoring, logging, metrics, and incident troubleshooting.
- Managed authentication, secrets, and secure access using Doppler, Authentik/IDP, AWS SSO, GitLab SSO, and cloud VPN solutions.
- Created and configured Jira boards for infrastructure and DevOps initiatives, managing workflows, sprints, issue tracking, priorities, and team visibility.
- Automated infrastructure validation and operational workflows using Terraform, Python, GitLab CI/CD, and IaC.

Wipro Limited | Tech Lead | Projects : Lloyds Banking, Enphase Energy

Apr 2025 - Apr 2026 | Vizag

- Led the management of GCP infrastructure, ensuring security and compliance through OS patching using Chef and Terraform, and vulnerability scanning with Signals of Security.
- Spearheaded the development and maintenance of CI/CD pipelines (GitHub Actions, Jenkins) to enable reliable and automated deployments.
- Oversaw multi-cloud migrations (AWS, GCP, Azure) using rehost/retain strategies with automated provisioning via Terraform and Chef, resulting in seamless transitions and improved resource utilization.
- Implemented DevSecOps practices using SonarQube, CodeQL, and Aqua, enhancing application security and reducing vulnerabilities.
- Led the deployment of containerized applications (Docker, GKE, Helm, ArgoCD) with robust monitoring and incident management, ensuring high availability and rapid response to issues.
- Built and deployed ML/AI applications using AWS SageMaker, MLflow for experiment tracking, and developed APIs with FastAPI and interactive dashboards using Streamlit, enabling scalable and production-ready ML workflows.

Genpact India Private Limited | Assistant Manager (DevOps) | Project: GE

Mar 2024 - Apr 2025 | Bellandur, Bangalore

- Implemented an enterprise-grade DevSecOps and Observability platform for cloud native applications running on Kubernetes (EKS/GKE), integrating security, compliance, monitoring, and automated governance into CI/CD pipelines.
- Integrated SAST tools like SonarQube and CodeQL into Jenkins/GitHub Actions pipelines to automatically scan source code, detect vulnerabilities, insecure coding patterns, secrets exposure, and code quality issues before deployment. Security gates were enforced to block builds if critical vulnerabilities or quality thresholds failed. Implemented DAST scanning using OWASP ZAP and container/image vulnerability scanning using Aqua Security to validate running applications, APIs, Kubernetes workloads, and container images against runtime vulnerabilities and misconfigurations before promoting releases to production.
- Established SOC 2 compliance readiness by implementing IAM least-privilege access controls, audit logging, encryption policies, Terraform governance, RBAC validation, centralized monitoring, change tracking, and automated compliance checks across AWS/GCP infrastructure. Terraform modules were integrated with policy validation tools to prevent insecure cloud configurations and ensure standardized infrastructure provisioning.
- Built end-to-end observability using OpenTelemetry for distributed tracing, metrics, and logs collection across microservices.
- Configured Open Telemetry Collectors to export telemetry data into centralized monitoring platforms for real-time visibility into application latency, API failures, pod health, infrastructure utilization, and service dependencies.
- Implemented proactive monitoring and alerting using LogicMonitor, Grafana, and Prometheus for dashboards, Kubernetes monitoring, node metrics, application performance tracking, and SLA monitoring.
- Configured intelligent alerting and incident response workflows using Opsgenie integrated with Slack and email notifications to reduce MTTR and improve operational reliability during production incidents.

Enqeuro Global LLP Genpact company | Sr Software Engineer | Project: Driscoll's

Dec 2021 - Feb 2024 | Koramangala, Bangalore

- Built and managed a microservices-based platform on AWS, handling infrastructure and application deployments. Provisioned and managed AWS resources using Infrastructure as Code, and supported application integrations using

Mulesoft Anypoint Platform.

- Automated tasks and scripting using Python to improve operational efficiency. Designed and implemented CI/CD pipelines using Git, GitHub, TeamCity, and Octopus Deploy, enabling automated build, code quality checks using SonarQube, and streamlined application deployments. Managed version control, branching strategies, and release workflows across environments.
- Monitored applications and system performance using New Relic, and provided production support by resolving deployment failures and infrastructure issues. This implementation improved deployment efficiency, code quality, and overall system reliability.
- Led cloud migration initiatives using AWS MGN and VM Import/Export for seamless lift-and-shift of on-prem VMs to AWS with minimal downtime.
- Built and enhanced CI/CD pipelines (GitHub Actions, Jenkins) to automate migration workflows and application deployments.
- Containerized and deployed applications on Kubernetes (EKS/GKE) using Docker, Helm, and ArgoCD, while optimizing big data workloads on EMR for performance, scalability, and cost efficiency.

Zevjet Technologies Infotech | AWS DevOps Engineer | Projects: Aris Global, WideOrbit

Feb 2018 - Dec 2021 | Madhapur, Hyderabad

- Built and managed CI/CD workflows using GitHub Actions (CI) and Jenkins (CD) on AWS, enabling automated build, testing, and deployment processes. Integrated code quality and security tools (CodeQL, Aqua) to ensure secure and compliant code deployments.
- Led GitHub repository migrations across GitHub Enterprise and GitHub Cloud, ensuring secure transitions with proper access controls and configuration consistency. Developed Python-based automation to support migration activities, including configuration validation and data handling.
- Managed application deployments on AWS and provided ongoing production support, resolving pipeline failures, deployment issues, and infrastructure challenges. This implementation improved deployment efficiency, strengthened security practices, and ensured smooth migration and operational stability.

PKL Limited | Project: Clix | Technical Support Engineer

Jun 2016 - Nov 2017 | Hyderabad, Telangana

- Provisioned and managed Azure resources including Virtual Machines, Storage Accounts, Virtual Networks, and Load Balancers.
- Built and enhanced CI/CD pipelines using Azure DevOps (Repos, Pipelines, Releases) to automate build and deployment workflows.
- Containerized applications using Docker and deployed on Kubernetes (AKS), implementing scaling, rollout strategies, and GitOps-based deployments using ArgoCD and Helm.

Kaivale Technologies | Project: Aspires systems | Software Developer

Jan 2014 - Jan 2016 | Bangalore, Karnataka

- Built and managed AWS infrastructure, implementing IAM policies and secure networking (VPC, ACLs) Developed CI/CD pipelines (Jenkins, Maven, Nexus, Ansible) and migrated build systems from ANT to Maven Automated infrastructure provisioning using Chef and scripting, improving environment setup speed
- Implemented code quality practices using SonarQube and scaled CI processes across teams Supported application deployments and platform stability through cross-team collaboration

Education

Shri Vishnu Engineering College For Women (Autonomous)

B.Tech, Mechanical Engineering

2013 | Bhimavaram

Awards

T20 Award - Recognition for outstanding contributions and performance.

Second place in Heckerton - Demonstrates teamwork, problem-solving skills, and innovation in a competitive coding

environment.
